

OUR ARMAMENTARIUM AGAINST CANCER

Tissue based 161 genes assay for comprehensive information on Targeted therapies

Tissue based 395 genes assay for comprehensive information on Targeted therapies and TMB

Tissue based 511 genes assay for comprehensive information on Immunotherapy and Targeted therapies including TMB, PD-L1 and MSI

Tissue 511 genes assay for Immunotherapy and Targeted therapies including TMB, PD-L1 and MSI.
Unique addition of targeted transcriptome/gene expression analysis for 20802 genes.

Encyclopedic tumor analysis of 511 genes of tumor tissue along with analysis of 52 genes of cell-free DNA, the unique assay to give insight into targeted therapies, Immunotherapy, Cytotoxic therapies and Drug toxicity reactions.

Encyclopedic liquid biopsy analysis of 411 genes, the unique assay to give insight into targeted therapies, Immunotherapy, Cytotoxic therapies along with drug toxicity reactions.

Liquid biopsy including ctDNA analysis for 52 genes along with CTC enumeration to analyze targetable alterations and disease monitoring

Tumor-informed and tumor agnostic analysis for ultra-sensitive personalized Minimal Residual Disease detection

LIQUID BIOPSY FOR LUNG CANCER

Liquid biopsy analysis of 12 Lung cancer specific genes to analyze targetable alterations
